

High 5 Software Releases New Version of its Service Business Management Software, Service Management Enterprise

KENMORE, Washington — July 20, 2009 — High 5 Software today announced it will launch a new version of its application, Service Management Enterprise (SME), which works with Microsoft Windows® 7 & Microsoft Windows Server® 2008 R2 to offer customers enhanced security, as well as innovative user interface features and reliability improvements. SME provides customers an all-inclusive solution to common service management functions to save companies time and money while instilling best practices to remain profitable, productive, & efficient. SME is packed with features to streamline and automate many daily business aspects such as data entry, billable opportunities, customer tracking, reporting, and more.

“Our ISV community is alive with innovation, and we’re committed to helping our partners drive the next generation of software experiences,” said Ross Brown, Vice President of ISV and Solutions Partners for the Worldwide Partner Group at Microsoft. “Adding compatibility for the latest Microsoft operating systems helps ISVs to stay ahead of the competition and give their customers access to cutting-edge technologies.”

“High 5 Software is excited to launch this new version of Service Management Enterprise (SME),” said Mark Stair, President at High 5 Software. “Making our application compatible with Microsoft Windows 7 & Microsoft Windows Server 2008 R2 helps us offer our customers compelling benefits, including improved security and reliability features, full support for multi-core processing, sophisticated management features, intelligent power management, and flexible access administration to improve mobile working.”

SME offers tracking, efficiency, automation, & productivity to your company with its full suite of features and continued development toward providing service companies a customizable solution for their specific needs.

High 5 Software is a leader in service management software solutions for field service companies in the Information Technology (IT), Telecommunications, Alarm Security, Fire & Safety Service, & HVACR industries.
